Circuit

Intelligent RFP Response Generation

Circuit understands your RFPs and past responses, intelligently creating high-quality proposals — automatically.

The Challenge

RFP response teams face mounting pressure to deliver more proposals with limited resources. Manual processes lead to rushed work, inconsistent quality, and missed opportunities. With response volumes increasing yearly, teams struggle to maintain quality while meeting tight deadlines.

The Solution

Circuit's AI transforms RFP responses by learning from your past wins and institutional knowledge. The platform automatically creates tailored proposals by intelligently combining proven content, accurate pricing, and technical specifications from your content library.
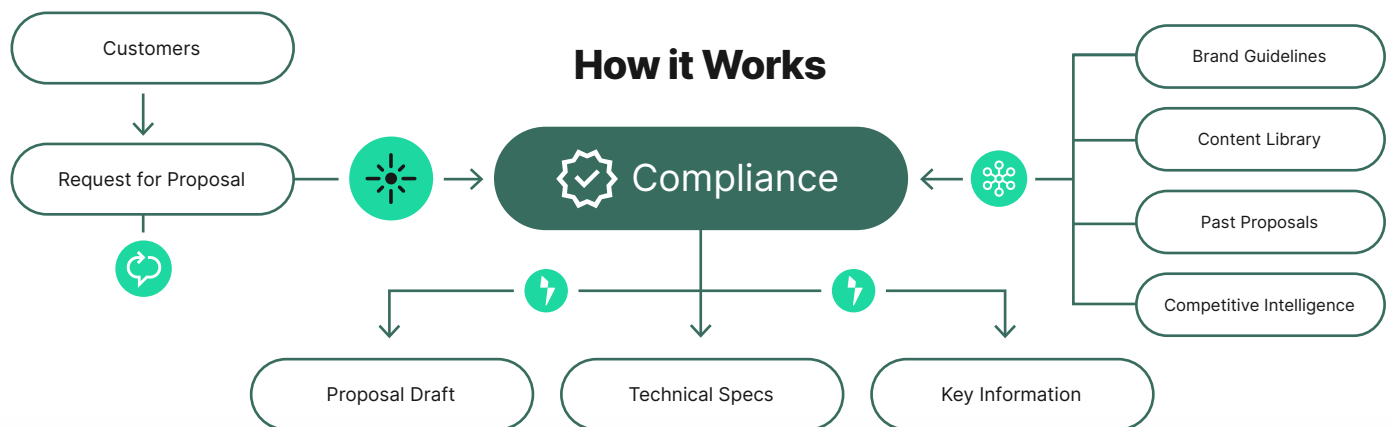

The Impact

Response time drops from 19 to 11 hours per bid while win rates increase to 47-52%. With AI-powered quality control and automated generation, teams can pursue more opportunities and maximize revenue – with 90% satisfaction rates.

40%
reduction in proposal time

46%
more proposals handled per team

5-10%
increase in win rates (42% > 52%)

How it Works

Customers → Request for Proposal → Compliance

Compliance inputs: Brand Guidelines, Content Library, Past Proposals, Competitive Intelligence

Compliance outputs: Proposal Draft, Technical Specs, Key Information

About Circuit

Headquartered in Austin, Texas, and led by former Silicon Labs CEO Tyson Tuttle, Circuit is building the world's first AI-powered knowledge network. Circuit's mission is to develop a new network for knowledge workers to transform static information into living content in order to be more productive. By connecting ideas, data, and people in real-time, Circuit empowers individuals and organizations to make faster, smarter decisions, enhance collaboration, and drive meaningful progress.
